

Horizontal motion conveying has played a very important role in the food manufacturing industry for many years. PūRmotion is the next generation of horizontal motion conveyance that offers a truly hygienic design but yet maintains the gentleness, flexibility and durability that is expected in your operation. The PūRmotion's open frame design gives you instant accessibility to every component of the conveyor allowing for easy sanitation and inspections. In addition, the servo driven motor is amazingly quiet and gives the operator complete control and flexibility by having the ability to reverse product flow almost instantaneously without disrupting upstream or downstream operations.
